Review

"The book is clear in style, with over 250 illustrations which are relevant to the content. . .It was easy to understand and could be read completely or dipped into according to topic area. . .Overall the book is a useful tool for primary care staff and due to the detailed illustrations and treatment section will be used frequently by the team." (Journal of Community Nursing, 1 November 2011)

"This highly illustrated ABC will be invaluable for GPs, GP registrars, junior doctors, medical students and primary care nurses." (Prescriber, November 2009)

From the Back Cover

With over 250 full colour illustrations the new 5th edition of the bestselling *ABC of Dermatology* covers the diagnosis and treatment of skin conditions for the non-dermatologist. It sets out the main types of clinical change that occur in and on the skin, and relates this to specific skin conditions and underlying pathological changes. It then summarises the relevant pathological processes, diagnostic features and learning points. The types of treatment are clearly differentiated - between those suitable for the patient to obtain 'off the shelf', on prescription, and in specialist units.

The *ABC of Dermatology* provides the core knowledge of diagnosis and therapy of common conditions and the general principles of skin condition management. Including new chapters on drug rashes, connective tissue disease, skin tumours, practical procedures, laser treatments and a practical guide to dressings and bandages, this highly illustrated ABC is the perfect learning partner for GPs, GP registrars, junior doctors, medical students and primary care nurses.

excellent photos and easy-to-read text

By Dance873

I am asking for too much, but I wish they had some MCQs at the end of each chapter to help readers recap what they learned in the text. Otherwise, I think the photos are excellent in quality and scope. The text is easy to understand and well written. For a non-dermatologist, this is a good introductory textbook that I would recommend. While it is called ABC of Derm, it is really quite in depth than that, at least for a non-specialist. It is a great book for a typical resident in internal medicine or family medicine training who wants to feel more confident when seeing patients with skin rashes.
