Very pleased; great for homeschool use.

By Sarah I.

This is a very thick good quality workbook with color work pages. I love this workbook because it begins with easier beginner basic map reading and skills and ascends in difficulty and skill in an apt way. There are a number of topics and skills included and each chapter and skill has many worksheets with brief paragraphs that explain each concept and skill. Each page is perforated and the pages are easy to take out and make copies. This book also includes a map and a sticker sheet for rewards.

This book isn't full of lesson plans, but I homeschool and I use this book to guide me with my lessons for map skills and map reading. I am able to use the paragraphs given on each page as a prompt for me to

discuss and demonstrate the concept as well as use the worksheets for reinforcement. I am especially happy to see that each chapter and skill has many topics and worksheets to do. This makes it easy for my boys to understand a given concept. There are so many topics and skills covered that this book will have at least a couple of years of content to cover.

Well Done Geography Worksheets for 3rd Grade

By Andy

This is one of several supplementary workbooks I got for my daughter when I was homeschooling her for part of her 3rd grade year. There are a ton of worksheets in here, as it is meant to be useable for more than one grade. Clearly, we didn't finish all of them. But the ones we did use, she actually enjoyed doing them. I felt like the explanations on the sheets was adequate. I also felt like it would provide support for grades above the 3rd grade. I didn't have any trouble navigating the sections, but it is a large book that has a lot of different sheets in it, so I would recommend removing the sheets you've completed so you don't have to keep flipping through them as you look for the next thing.

A bit provincial in its approach.

By tachi1

This is a pretty good way to teach (or reinforce) the knowledge of geography, particularly geography of the United States. They can learn about the cities, capitals, terrain, products, and so on about each state. While useful, I don't think this is particularly fascinating. The book also teaches how to read the different types of maps, although I have found that this skill seems to be almost intuitive for most children and they grasp it without effort.

If it had been up to me, I would given the rest of the world a more prominent treatment. I would have made it half US and half the rest of the world. Kids today are aware of news events. I think that it would have made it easier for children to understand international perspectives if they, for example, are taught where Korea or Iran are as well as European cities where there might have been a terrorist attack or a South American country where there might have been a natural disaster. The rest of the world is just glossed over lightly as if not much of interest is likely to be there.
