Review

"Leadership guides abound, but this one takes a unique tack and, consequently, is more involving and resonant than most. The authors, both from academe, put their individual expertise and creative thinking together to debunk a couple of leadership theories they have no use for: that virtually anyone can become a leader and that leadership can be manufactured by earning a business degree and attending business seminars. To these authors, leadership "is an uncommon composite of skills, experience, and ripened personal perceptions." The latter is achieved by cultivating a personal philosophy of life, which may be achieved by a regimen of self-examination based on the philosophies of such ancient thinkers as Aristotle and Sophocles. Once potential leaders have established a deep understanding of themselves, those truths can be applied to workplace situations. The authors are convinced that good leadership will then be the result. This book is certainly not a quick-fix for making true leaders out of ordinary managers; instead, it is a book to be slowly digested and then acted on in deliberate fashion." --Booklist

From the Inside Flap

Authentic leadership is more than just the sum of your skills and experience. It comes from inside, and requires the cultivation of a personal philosophy that carefully examines the nuances and complexities of life. If you want to transform yourself into an inspired leader--one capable of taking your organization and people to new heights--who better to look to for guidance than some of the greatest thinkers in history?

Exploring the writings of classical figures such as Thales, Plato, Aristotle, and Hesiod, *The Ten Golden Rules of Leadership* emphasizes the critical difference between genuine leadership and mere administration. Bridging the gap between timeless wisdom and modern business, the book examines ten crucial axioms of leadership, including:

Know Thyself. Understanding your inner world, and your personal strengths and weaknesses, is a

fundamental precondition necessary for true and lasting leadership.

Nurture Community in the Workplace. Exceptional leaders provide the right support, guidance, and incentives to sustain an environment conducive to greatness.

Let Competition Reveal Talent. Harness the forces of competition constructively to release the ingenuity and creativity of your employees toward the pursuit of your corporate goals and objectives.

Always Embrace the Truth. Encourage candid criticism throughout your organization, be skeptical of flattering appraisals, and never let authority place a wedge between yourself and reality.

The qualities and practices of outstanding leaders have remained constant since civilization began. This book is an invaluable source of insight and vision that will help you become the leader you are meant to be.

Leadership comes from inside—and the greatest leaders first question themselves before they tackle the world around them. To aid in this critical interrogation, *The Ten Golden Rules of Leadership* explores ideas from Aristotle, Heraclitus, Sophocles, Hesiod, and other great thinkers, including:

Know thyself • Do not waste energy on things you cannot change • Nurture community • Always embrace the truth • Let competition reveal talent • Live life by a higher code • Understand that character is destiny

Then it shows you how to take each idea—along with what you've learned about yourself—and apply it to the challenges of the modern workplace.

As Aristotle tutored Alexander the Great, you too will learn what it takes to conquer all.

Genuine Leadership Insight

By Jessica L Roy

Great book that reveals the true meaning of leadership. If only these lessons could be learned by many in positions of authority. If you read this book and think the topics are untrue then I would take a look in the mirror and contemplate the need to better "know thyself".

Small, but powerful words..

By James M.

Given I've had both authors as professors, I'm a bit biased; but they wrote an amazing book and still continue to teach me to this day.
